Product Availability

You know that in most cases, we ship out orders the same day we receive them. In fact, over 95% of orders from our \$1.5 million dollar inventory go out the same day!

**There are, however, some products that we just won't ship to you . . .
... if you don't know about them, that is!**

We don't really want to keep some of our stocked products secret, but we do have variations of some catalog designs on the shelf that you should know about.

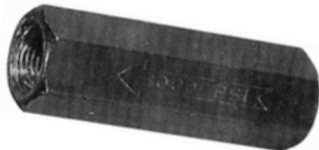

Our popular series of **In-line Relief Valves**, the RF-T**-*-30 models, are cataloged with NPT ports. You might find **SAE O-Ring** ports useful. ***We have them.***

Available now at the same price as the NPT versions are:

RF-T04**-30-SAE
(3/4 – 16 St. Thd O-Ring Ports)
RF-T06**-30-SAE
(1-1/16 – 12 St. Thd O-Ring Ports)
RF-T10**-30-SAE
(1-5/8 – 12 St. Thd O-Ring Ports)

Additionally, our **In-line Check Valves** are in stock and available in **larger** sizes than those cataloged. They are in the Price List.

We have: CI-T12-05-10, 5 PSI, 1-1/2" NPT
CI-T12-50-10, 50 PSI, 1-1/2" NPT
CI-T16-05-10, 5 PSI, 2" NPT
CI-T16-50-10, 50 PSI, 2" NPT

FIRST TIME?
We constantly add email addresses of our distributors and associates, so if you received this for the first time - **GLAD TO FIND YOU!**
If you want to see previous releases, check our web site under "News."

Wishing you the best,
Jim Cubberly, Product Manager
